

IN THE CLAIMS

Please amend the status of the claims to that as indicated below:

1. (currently amended) A method for a photosensitive cockpit windshield of the type suitable for use with airplanes, comprising the steps of: (a) providing a photosensitive portion of a windshield which automatically changes from a transparent state to a darker state in response to varying light conditions; and (b) adjusting the light sensitivity of said ~~photo-sensitive~~ photosensitive windshield, said photosensitive portion being surrounded by an area of said windshield not being photosensitive.[:,]

2. (previously presented) The method of Claim 1, further comprising the step of controlling a photo-sensitive circuit of the photosensitive portion of said windshield to enable or disable operation of the photosensitive windshield.

3. (previously presented) The method of Claim 2, further comprising the step of adjusting the opacity of the photosensitive portion of the windshield.

4. (previously presented) The method of Claim 3, further comprising the step of adjusting the response rate of the photosensitive portion of the windshield.

Claims 5 – 18 (canceled)
